## WEATHER INTERFERES WITH THE WETASKIWIN EXHIBITION

**Indian Parade Best Ever Held Here. Elks Give Treat to Six Hundred Kiddies. Old Timers' Museum a Feature. Baseball Tournament called off, and Auto Races Considerably cut down. Indians have Good Horse Races. Full List of Prize Winners.**

The twenty-sixth annual exhibition of the Wetaskiwin Exhibition Association was held on Thursday, Friday and Saturday of last week. The fair was originally intended to be held on Thursday and Friday only, but heavy rains on Thursday caused the management to put on the list of attractions on Friday and Saturday.

The attendance on Thursday and Friday was poor, owing to the weather but the Saturday attendance was good, although not creating a record. Owing to the low gate receipts and the heavy cost of attractions, the directors of the association have decided to pay 75 per cent of the prizes awarded. By doing this the fair will break about even on the exhibition, and no further amount will be added to the debt now owing.

For the first time, the exhibition just on an Old Timers' museum exhibit, and this class received two very interesting exhibits, although we were sure that more could have been found to compete in this class. An old copper pot shown by Mrs. Letimer and an old chimney lamp shown by Mrs. E. B. Switzer took first and second prizes respectively. The article taking the first prize had been the property of Mrs. Letimer, the first white woman in Wetaskiwin, for upwards of thirty years. Mrs. Letimer got the pot from some Indians who had used it for cooking in the olden days.

The Indian encampment and parade was the best ever held in the city, and was one of the features of the exhibition. Dressed out in full war paint the Hobbema Indians paraded the streets each day, and gave pow-wows in front of the grandstand. Their camp in the centre of the race track was well worth visiting.

The Elks of the city deserve great credit for the way the kiddies were shown a real time at the fair. Some 60 kiddies were admitted to the fair free of charge and in addition handed tickets which entitled them to four free rides on the merry-go-round, or admission to any of the side shows.

The merry-go-round was kept busy giving the kiddies their rides, and in between rides they made tracks for the Elks booth where free ice cream, soft drinks and popcorn were dispensed until the supply was exhausted. Fifteen gallons of ice cream were given out, nearly 1,000 bottles of pop, and a barrel full of popcorn, before the Elks decided that the kiddies had enough for one day.

The midway, owned by Conkle & Garrett, received much attention, and was considerably better than midway at the fair in former years.

The baseball tournament, which was to have included seven teams, was called off on Friday morning owing to the rain, but the Hobbema Indians and Hunt Lake put on two exhibition games on Saturday, which were well attended. The diamond was still in poor shape, but good baseball was played nevertheless. The Indians captured the afternoon game and Hunt Lake the evening game.

The auto races were also considerably cut down on account of the wet track, but the two races held were good. Chas. Nelson taking the two mile race, and Jimmie Chapman of Edmonton, the three mile event. The last race was made in extra good time considering the track, the time for the three miles being 3:24.

The half mile Indian horse race on Friday was won by Kogo, Ist. Tom Lightning, 2nd and Peter Gray, 3rd. The three quarter mile Indian dash held Friday was won by Dan Mink Ist, Jacob Schulte 2nd, and Sam Oster, 3rd.

The races the second day were as follows: Half mile Indian race (best 2 in 3 heats)—Ist, Tom Lightning; 2nd, Kogo; 3rd Peter Gray. Three quarter mile dash (square riders)—Ist, Mrs. Tom Oster; 2nd, Mrs. Dan Mink; 3rd Mrs. Jacob. The result of the winners in the different classes are as follows:

**HORSES**  
Clydesdales or Shires  
Stallion, 3 years or over—2, E. E. Edwards; 3, H. T. Rix.  
Stallion, 1 year old—1, A. W. Rix; 2, E. E. Edwards.  
Filly, 2 years old—1, E. E. Edwards; 2nd, 1924—1 Wm. Thirsk; 2, Wm. Nelles.  
Brood mare, with foal at side—1, W. Nelles; 2 Wm. Thirsk.  
Dry mare—1, A. W. Rix; 2, A. W. Rix; 3 Wm. Thirsk.

**Percherons**  
Filly, 2 years old—2 Robinson & Watts, Perinotah.  
Foal, 1924—1 Robinson & Watts; 2 Robinson & Watts.  
Brood mare with foal at side—1 and 2 Robinson & Watts.  
Dry Mare—1 Robinson & Watts.

**Belgians**  
Stallion, 3 years old—1 Tom Bolton  
**Heavy Draft**  
Team in harness—1 A. W. Rix; 2, T. Bolton; 3, A. B. Everts.  
Foal, 1924—1 E. Becking; 2 Levi Evans; 3 C. P. Pennington.  
Filly or gelding, 1 year old—1 C. P. Pennington.

**Filly or gelding, 2 years old—1 A. W. Rix; 2, A. B. Everts.**  
Brood mare, with foal at side—1, E. Becking; 2 Ed. Bolton; 3, Levi Evans.  
**Agricultural**  
Saddle horse—1, E. Becking; 2, C. R. Shantz; 3, A. W. Rix.  
Filly or gelding, 1 year old—1 A. W. Rix; 2, C. R. Shantz; 3, Levi Evans.  
Filly or gelding, 2 years old—1 A. W. Rix; 2, C. R. Shantz; 3, W. Nelles.  
Brood mare, with foal at side—1, C. R. Shantz; 2 C. P. Pennington; 3, P. & A. Redman.

**Driving Class**  
Filly or gelding, 2 years old—1, E. Mermer.  
Team to buggy—1, P. J. Alderman.  
Dry mare or gelding—1, Mrs. F. Ward; 2, R. Hawkins.

**Ponies**  
Saddle Pony—1, C. R. Shantz; 2, P. & J. Redman; 3, Yada Churchill.  
**Saddle Horses**  
Saddle horse, under saddle—1, E. Mermer; 2 Mrs. F. J. Alderman; 3 H. T. Rix.  
Saddle horse, ridden by lady—1 Mrs. John Redman; 2 Mrs. Alderman; 3 Lila Alderman.

**CATTLE**  
**Short-horns**  
Bull, 3 years or over—1 Walter A. Shantz.  
Bull, 1 year old—1 Wm. Thirsk.  
Cow, 3 years or over—1 and 2, Wm. Thirsk.  
Heifer, 2 years old—1 Wm. Thirsk; 2 Wm. Thirsk.  
Heifer, 1 year old—1 Wm. Thirsk; 2 Wm. Thirsk.  
Champion male—Wm. Thirsk.  
Champion female—Wm. Thirsk.

**Aberdeen Angus**  
Bull, 3 years or over—1 L. H. Newville.  
Champion male—J. H. Newville.  
**Ayrshire**  
Bull, 3 years or over—1 A. W. Rix; 2, O. Youngberg; 3, R. W. Armstrong.  
Bull, 1 year old—1 O. Youngberg; 2 O. Youngberg.  
Cow, 3 years or over—1 and 2, O. Youngberg.  
Heifer, 2 years old—1 and 2, O. Youngberg.  
Heifer, 1 year old—1 O. Youngberg; 2 O. Youngberg.  
Champion male—O. Youngberg.  
Champion female—O. Youngberg.

**Jersys**  
Bull, 3 years or over—1 J. J. Christy.  
Bull, 1 year old—Mrs. W. J. Pickard.  
Bull, 1 year old—1 and 2 Mrs. W. J. Pickard.  
Cow, 3 years or over—1 and 2, Mrs. W. J. Pickard.

(Continued on Page 4)

## TEACHERS ENGAGED FOR HIGH SCHOOL

At a meeting of the public school board held a few evenings ago, the three vacancies on the Wetaskiwin high school staff were filled. A number of applications were presented for each of the vacancies, and the board feels that a good staff of teachers will be in charge of the high school during the ensuing term.

The application of Mr. Poops, M.A., who was principal at Hanna, was accepted for the principalship, at an initial salary of \$2400. The other successful applicants were Mr. F. F. Tracy, B.A., formerly of Alberta College North, Edmonton, and Miss Bawden, B.A., formerly principal of Vermillion high school. Mr. Tracy will receive a salary of \$1800 and Miss Bawden \$1700. The other teacher will be Miss James, B.A., who was on the high school staff last term, and whose remuneration will be \$1700.

## TWO ADDRESSES AT KIWANIS MEETING

The international convention held recently at Denver, was the subject of two very interesting addresses at Tuesday's meeting of the Kiwanis Club. Kivian H. R. French occupied the chair in the absence of President Charlie Russell, and during the supper announced that full details of organization for the big Kiwanis Kids' Picnic to Pigeon Lake had been completed, and read the lists of those who will act on the various committees.

President Charlie Reed, Vice President Doc C. C. Tatham, and Secretary Roy Henry of the Edmonton club again showed their interest in the local organization by being present, and the two first named were the speakers of the evening. During the international convention his topic, Mr. Reed gave a full outline of the proceedings. He said there was a wonderful spirit manifested among the 1200 clubs with 50,000 members, and while there were some differences of opinion on the floor of the convention, these were due to the fact that the delegates have the interests of the organization at heart. The four fundamentals of Kiwanis were strongly emphasized, namely: 1, to give primacy to the human and spiritual rather than to the material values of life; 2, to encourage the daily living of the golden rule in all human relationships; 3, to provide through Kiwanis clubs a practical means to form enduring friendships, to render altruistic service, and to build better communities; 4, to co-operate in vigorous growth and filling of the past, but, slowly maturing, during the past week, according to the crop report issued today by the Canadian Pacific railway.

There is no manifestation of rust, according to the report, nor damage from other causes apart from the small areas damaged by hail.

Livestock receipts at the various stockyards continue heavy and there is a good demand for quality stockers and feeders at improved prices. The market is generally better than during the previous week.

Manitoba.—The crops generally look promising and grain is filling cut well and rust reported during the previous week has made a further progress. With favorable weather condition should begin about the twenty-fifth and become general September first. The large area of first year crop is showing good growth and barley. Pastures are good and live stock is doing well.

Saskatchewan.—The weather has been cool with showers during the past seven days in this province. Sufficient precipitation has occurred and a good yield of sunflowers are essential to bring grain to maturity. The feed situation has improved in the drought areas, but of little benefit to grain crops. The cutting of earlier sown crops should commence about the twenty-third and grain about September first.

Alberta.—The weather conditions have been cool with heavy rainfall over the entire province. This moisture has somewhat improved the late crops in the drought areas as well as the feed situation, but with the low prevailing temperatures, has retarded the ripening of crops. The weather will probably begin about the 20th, and become general toward the end of the month.

On the E.D. & B.C. railway recent

## CUTTING STARTED IN THE DISTRICT

The first grain cutting reported in this district was on Monday of this week, when the Schoening Brothers put the binder into the field of barley north east of the city.

## WEDDINGS

**ELLIOTT—REDMOND**  
On Thursday, August 7th, a quiet wedding was solemnized at the home of Dr. and Mrs. William C. Redmond, 3818 108th street, Edmonton, when E. Josephine Redmond, youngest daughter of the late Mr. and Mrs. Joseph J. Redmond, of Pictou, Ontario, became the bride of W. Howard Elliott, of Camrose, Alberta.

The brother of the groom, Rev. A. L. Elliott, of Wetaskiwin, officiated in the presence of immediate relatives. Among these were the groom's mother, Mrs. A. E. Elliott, and Mr. and Mrs. S. D. Blair, of Red Deer, Mrs. George Jamieson, of Nominis, and Miss Annie Redmond, of Winnipeg, sisters of the bride.

Following the ceremony and the congratulations of their friends, a fairly lengthy luncheon was served, after which the happy couple left for Jasper Park, where they will spend their honeymoon. On their return Mr. and Mrs. Elliott will make their home at Camrose.

## OLSON—JEGLIUS

A very quiet but pretty wedding took place at Edmonton on August 8, in the office of the marriage commissioner, when Blanche, youngest daughter of Mr. and Mrs. J. E. Jeglius, of Wetaskiwin, was united in the holy bonds of marriage to Lars Olson, of Pictou, N.S.

After the ceremony the happy young couple took the evening train back to the home of the bride, where the wedding dinner was awaiting them. Following a few days visit at Wetaskiwin, Mr. and Mrs. Olson left on the evening train for Pictou, where the groom is engaged in teaching.

## HARVEST GENERAL

### AT END OF MONTH

(Special to The Times)  
Winnipeg, Aug. 11.—Heavy rainfall over the three prairie provinces with moderately cool temperatures has resulted in vigorous growth and filling of grain, but, slowly maturing, during the past week, according to the crop report issued today by the Canadian Pacific railway.

There is no manifestation of rust, according to the report, nor damage from other causes apart from the small areas damaged by hail.

Livestock receipts at the various stockyards continue heavy and there is a good demand for quality stockers and feeders at improved prices. The market is generally better than during the previous week.

Manitoba.—The crops generally look promising and grain is filling cut well and rust reported during the previous week has made a further progress. With favorable weather condition should begin about the twenty-fifth and become general September first. The large area of first year crop is showing good growth and barley. Pastures are good and live stock is doing well.

Saskatchewan.—The weather has been cool with showers during the past seven days in this province. Sufficient precipitation has occurred and a good yield of sunflowers are essential to bring grain to maturity. The feed situation has improved in the drought areas, but of little benefit to grain crops. The cutting of earlier sown crops should commence about the twenty-third and grain about September first.

Alberta.—The weather conditions have been cool with heavy rainfall over the entire province. This moisture has somewhat improved the late crops in the drought areas as well as the feed situation, but with the low prevailing temperatures, has retarded the ripening of crops. The weather will probably begin about the 20th, and become general toward the end of the month.

## THE VEGREVILLE SCHOOL BURNED

Vegreville, Aug. 10.—Damage to the extent of about \$5,000 was done to the public school by a blaze which broke out at three o'clock this afternoon between the ceiling of the third story and the roof. The blaze was placed under control with the greatest difficulty. It was confined to the garret but broke through the roof in several places and was finally extinguished only when the collapse of the roof seemed imminent.

Considerable damage was done to the interior of the building by water and smoke, and as well as requiring to be removed, will have to be replastered throughout. Maps, charts, etc., will be a total loss. The building is of solid brick construction and otherwise would have been a total loss. The only suggested origin of the fire is defective wiring. It is doubtful if the school can be repaired in readiness for the opening of the fall term.

## GORGES OF ALBERTA YIELD THEIR SECRETS

Days in Alberta when a huge inland sea billowed and waved, and when dinosaurs splashed about in the shallow waters of the fringing, were portrayed by Prof. W. A. Parks of the University of Toronto, in the geology section of the British Association recently. Describing the geological formations in which some fifteen of the prehistoric monsters have been located in the Red Deer valley, Alberta, Prof. Parks told how rivers have cut deep trenches through the western plains, and slashed the prairie country with gorges 200 to 450 feet in depth. Each of them is virtually a gash through the surface of the continent, in which can be studied the rocks that compose the upper 500 feet of its surface.

"From an examination of the gorges it is possible to reconstruct the history of the time at which the layers of rock were formed," Dr. Parks stated. "The climate of the time, the trees and bushes that existed, the animals that roamed about the earth or even in the waters, are all indicated in the clays, sand and other rocks of the cut banks of the rivers, and it needs only patient work to decipher the record and make alive again the conditions of the far-away age and the creatures that inhabited the area."

"The rocks exposed in the Red Deer valley, which is one of these gorges, are of the Paleocene and Upper Cretaceous strata. They were laid down when a great interior sea was making its last stand on the prairie, before the beginning of its retreat to the Gulf of Mexico."

"At times sea conditions prevailed and the water was that of the open sea. At other times the waters were brackish, or even fresh."

"When the brackish water conditions prevailed, dinosaurs existed on the land, in the marshes at the margin of the sea, and in the salty waters beyond. The dinosaurs, a special race of reptiles, were highly developed, and lived in large numbers."

"Their skeletons are exposed in great numbers up and down the Edmonton and Belly river formations, and the bones of the sea animals, claiming it was out of proportion to other places. The letter was filed."

A. Bengtson offered to purchase a shack on Pearce street east for \$15. The offer was not accepted.

C. H. Davis, city treasurer, wrote regarding two weeks' leave of absence during August. The request was granted.

The following accounts were then passed for payment: General, \$102.30; Electric Light, \$26.30; Waterworks, \$2.75; Supplementary payroll, \$124.15.

The chief of the fire department submitted his report for the month of June and July, stating that there had been one fire during the period,

## CITY COUNCIL DISPOSES OF LARGE AMOUNT OF BUSINESS

**New Chief of Police Selected. Reports from Medical Officer of Health and Fire Chief Received. Several Letters Read Regarding Taxation. Offer for Property Accepted. Noxious Weeds in City Have Been Destroyed. Five Appeals from Court of Revision to Judge.**

A regular meeting of the city council was held on Tuesday evening with all the members in attendance. The minutes of the last regular meeting were read and adopted on motion of Ald. Gothard.

Messrs. Anderson, Swanson and Mrs. Youngberg addressed council regarding property owned by Mrs. Youngberg, asking that two vacant lots owned by her be taken over by the city. Mrs. Youngberg was informed that it was probable that the city would receive title to the lots this year.

A letter was read from a firm of financial agents asking for the city's cooperation in a general industrial drive to be carried on for the whole of western Canada, and requesting that the city take advertising space in a book to be printed and distributed setting forth the advantages of the west. The letter was ordered filed.

Leggie & Manley wrote respecting the J. G. Cornell property, which is being withdrawn from the city limits, asking for the signatures of the mayor and secretary treasurer to agreement. The mayor and secretary were authorized to sign same.

W. H. Hochstetler, Belleville, Iowa, and several others, wrote appealing against their assessment. The writs will be informed that the appeals arrived too late to be considered by the Court of Revision.

Mr. Taylor, the local weed inspector, wrote regarding the destruction of noxious weeds in the city, stating that weeds must be destroyed at once. It was brought to the notice of the council that several of the places mentioned containing noxious weeds had been attended to. The letter will be acknowledged.

This brought up the matter of cutting grass and weeds on streets and vacant lots. The public works committee was authorized to have this done.

Mr. Faulkner addressed council regarding the purchase of house and lot on Lansdowne street east, offering to pay \$225 for same. The offer was accepted.

Jas. Henderson & Co., the city auditors, wrote stating that they would be unable to audit city's books for a week or so. The letter was filed.

C. A. Morris requested permission to take twelve loads of sand from near water tower to fill in property. The request was granted, same to be taken the afternoon of the public property committee.

Mr. McLeod, of the department of neglected children, wrote respecting a case which had come to his notice, and asking for a report on same. The report will be given the department.

The British American Oil Co. wrote regarding business assessment, claiming it was out of proportion to other places. The letter was filed.

which was too far out to be reached with water hose. The chief also submitted payroll for firemen of \$14.00. The report was adopted and the payroll passed for payment.

Tenders were opened for printing general receipt forms for the city and the Wetaskiwin Free Press submitted the lowest tender, were awarded the work.

Applications for the position of chief of police for the city, were then considered from the following: D. H. Marshall, A. Patenande, D. Allister, Frank Kingzett, Clarence Freeman, J. E. Wolf, A. L. McIlhargy, Wetaskiwin; H. S. Ness, Chesterwood; J. S. Archer, Brightview; George Shantz, Coeyne; Frank McDougall, Edmonton; Thos. R. Brewer, Blairmore; J. F. Robertson, Ponoka. The police committee recommended that the application of Thos. R. Brewer, Blairmore, be accepted. It was then moved that the recommendation of the police committee be adopted.

It was moved in amendment that the application of Frank Kingzett be accepted. The amendment carried. Ald. Parker and Chandler voted against it.

It was moved by Ald. Brown that the salary of the chief of police be \$100.00, the chief to provide his own uniform.

The matter of cutting grass and weeds in the cemetery was referred to the public property committee.

The mayor reported that there were five appeals from the court of revision in the city, stating that the appeal of Jas. Henderson & Co., who had set August 29th for the hearing of the appeals. Those appealing are R. M. Angus, on property on Macleod street and other vacant lots in city; P. Burns & Co., on acreage; E. J. Kelley on farm lands, east of city; MacEachern Milling Co., Ltd., on assessment of mill and elevator; and the Alberta Pacific Grain Co., Ltd., on assessment on two elevators. All the appeals are against excessive valuation. The finance committee were appointed to look after the city's interests in the cases.

The finance committee reported progress on the bylaw setting the mill rate for the year.

Meeting adjourned.

## Concert at Crooked Lake

A free concert will be given at the Crooked Lake school on Tuesday, August 19th at 5 p.m. by the Sunbeam Young People's Society of the Swedish Baptist church. The following is the program:

Bible reading and prayer.  
Song by the choir.  
Solo by Miss Didrikson.  
Duet by Esther and Edwin Brandt.  
Recitation by Emanuel Kraut.  
Song by male trio.  
Song by the choir.  
Address by Rev. Turnwall, of New Norway.  
Duet by Esther and Edwin Brandt.  
Recitation by P. M. Meyer (Swedish).  
Song by the choir.  
Closing prayer by pastor.  
Ice cream and cake will be served for the small cost of 20 cents.

## QUESTS AT AUTO CAMP

The following tourists took advantage of the local auto camp during the past week:

## Here and There

Quas tubes filled with water are used as incubators for trout eggs at the Ontario Government Hatcheries.

Designed to prevent mildew, a Californian has invented a device which sprays wet or dry sulphur over grape vines.

More than 35 tons of food are required daily to feed hogs on a California ranch and it is distributed by means of an electric railway using side dump cars.

The light producing apparatus of the glow worm and firefly is said to be the most efficient in the world. The glow worm's light is eighty times more efficient than a tungsten lamp.

Construction of a million and a half dollar factory building has commenced in Cornwall, Ont., which, when completed, will give employment to 500 hands. Artificial silk will be manufactured from pulpwood.

Crossing from Oshesburg to Oshes in 5 days 10 hours, the Canadian Pacific S.S. Empress of France created a new record for the trans-Atlantic voyage. Her average speed on the record run was 20.15 knots.

Montreal officers of the Dominion Express Company state that the trans-Atlantic shipments will have even much heavier than heretofore. The Ontario crop ripened quickly, but was easily disposed of.

Alberta Government wolf-hunters will this season again penetrate the barren land and wage war on the timber-wolves which prey on the caribou herds. Last season the hunters killed off several hundred of the predatory beasts in the country westward of Great Slave Lake.

Beginning in the Autumn, German express trains will be equipped with combination radio and wireless telephones, enabling the sending of wireless messages, telephoning and the giving of radio concerts while the train is travelling at a high rate of speed.

A world's record for his senior two-year old, Hobson, Fredrick Hoffer, Williamsburg, Ontario, is claimed by Dr. M. W. Locke, Williamsburg, Ont., as a result of a 30 day test showing production of 2,788.5 pounds of milk and 113.82 lbs. butter fat, equivalent to 148.8 lbs. of butter.

The official Railway Guide, in comment on the Air service which connects with the Canadian Pacific Railway at Angliers says: "So far as the world is concerned this is the first instance in this continent where interchange of passenger traffic between railways and airplanes has been established."

In his address to the Associated Veterinary Clubs of the World at Windsor, July 17th, E. W. Beatty, president of the Canadian Veterinary Association stated that the animals from colonization by the Canadian Pacific Railway and the Canadian Government from the year 1911 totalled, respectively \$67,000,000 and \$25,000,000.

During the last four years the Canadian Pacific Railway has handled some \$50,000 worth of harvesters. Last year this company incorporated the harvesters, car, which afforded facilities hitherto unknown, and, although perhaps not as direct result of this innovation, over 20,000 men travelled in special trains over Canadian Pacific lines.

The unveiling of a monument to Tom Wilson, earliest guide in the Canadian Rockies featured the first day's meeting of the two hundred and six members of the Trail Riders of the Canadian Rockies at Yoho Camp. Mr. Wilson, who was present at the ceremony and, now sixty-five, is a well known mountaineer. He discovered Lake Louise and the Yoho in 1882.

A. D. MacTier, vice-president of the Canadian Pacific eastern lines, who awarded to the Meadham team the First Aid Challenge Cup, which they won in competition with teams from North Bay, Toronto, Windsor Station and Angus, stated that since the Canadian Pacific Council of the St. John Ambulance Association was inaugurated in 1909, over twenty thousand employees of the Company have received instruction in First Aid. The last annual report of the St. John Ambulance Association referred to the Canadian Pacific as the "pioneer railway centre."

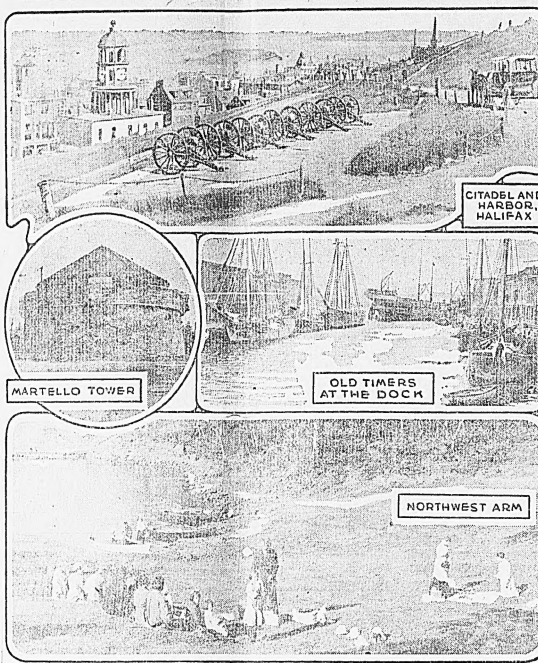

## THE GERMAN MENACE

Germany, having refused to allow the military control commission to inspect the military forces any time and without notice, Marshal Foch has ordered the commission to suspend operations with the German war department. It is charged that Germany has, by the training of non-commissioned officers, been secretly avoiding the limit on her army set by the treaty of Versailles, and could out into the field quickly an army of millions, thus constituting a menace to France. If a menace to France, then, judging from the great war, a menace to the world.

## THE THIRST FOR WINE

Sales of wines in Quebec province in the year ending June 30, increased over 600 per cent, the sale of hard liquor decreasing in almost equal proportion. Sales through the mail increased considerably.

## HALIFAX TO DON GALA ATTIRE

One hundred and seventy-five years ago, Colonel the Honorable Edward Cornwallis, twin-brother of the gay Archbishop of Canterbury, and uncle to Lord Cornwallis who surrendered to Washington at Yorktown, sailed his Majesty's ship "Spheer," followed by her full, wooden sisters "Fairy Jacks," "Fair Lady" and eleven more, into what is to-day Halifax harbor. It was esteemed a great feat for those long ago days and the voyage across the Atlantic took many weeks. Halifax is to-day a thriving, modern city and a great port, but she forgets not the brave Englishmen who laid the firm foundations on which she is built.

The first fortnight of August will witness a carnival celebration in honor of Halifax's 175th birthday. A replica of the "Spheer" will sail into the harbor and the landing of Cornwallis and his crew will be re-enacted at some spot along the shores of Point Pleasant Park. It is impossible to anchor here the original "Spheer" did as a mass of piers belonging to a great oil industry now covers that part of the harbor.

Clad in the picturesque costume of 1740, the impersonator of the founder of Halifax will step ashore with his entourage and, joined by the waiting throng, proceed to some pretty glade in the Park or to the grounds of Dalhousie University. There a pantomime of laying the foundation of what proved to be a Citadel City and a fortress for Britain's establishment on this continent, will take place. Indians and French in old-time dress will be in evidence.

Many entertainments are planned for the carnival week: yacht races, regatta, horse races, athletic contests and military tattoos are some of them. The carnival will coincide with the visit of the British world-squadron of warships, and also the finish of an international yacht race with 17 entries from New Rochelle, N.Y., to Halifax. The Northwest Arm will provide boating and bathing and delightful nooks for picnics along its pretty shores. The unveiling of the "Cross of Sacrifice," a fine memorial in honor of the Nova Scotians who died at sea during the World War, will occur on the headlands of Point Pleasant Park.

Nova Scotia is a truly delightful summer vacation land and draws many tourists from far and near each year. Halifax's celebration will be an added attraction for 1924 visitors to that sea province.

Thousands watch flames destroy Northern Seed Co. buildings. The principal buildings of the Northern Seed Company plant at 10th street and 8th avenue, including the mill and elevator, were destroyed by fire shortly after midnight this morning. The loss is estimated at \$75,000, including \$50,000 on the buildings, \$20,000 on the machinery and \$5,000 on the grain. There is considerable insurance on the property according to Thomas Burke, assistant manager. He did not know whether or not the entire loss would be covered.

The buildings burned were the mill, the mill with an adjacent brick machinery storehouse in the rear, the elevator, and a grain warehouse in the rear of the latter.

Two smaller buildings, one at the office and the other a warehouse, were saved, although the flames spread to them several times.

Both the two larger buildings collapsed gradually as they burned. As the buildings collapsed, firemen were several times endangered, especially when the heavy galvanized sides of elevator fell, but nobody had been injured up to 3 o'clock, when the fire and nearly burned itself out.

FAIR PLAY TO DOMINIONS  
It is necessary that there be greater equity in representation in a greater spirit of fairness and cooperation all round at international conferences, when the interests of the British Empire are at stake. Hon. J. H. Thomas, colonial secretary, has therefore called an empire conference to be held in London in October. This question is now under inquiry by Major Duncan, who is acting for the department of labor and under federal authority.

FAVORABLE TRADE BALANCE  
The official figures for the year ending June 30, show a favorable balance of Canadian trade, which in turn should indicate growing prosperity.

Shipping was 70 cents per box, which included administration charges. This question is now under inquiry by Major Duncan, who is acting for the department of labor and under federal authority.

## Here and There

Radio stations are to be established in Montreal and Vancouver as links in the Empire wireless station program as the result of arrangements just completed between the British Government, the Department of Marine and Fisheries of Canada and the affiliated Marconi companies.

The Manitoba Pulp and Paper Company will, it is understood, shortly establish a plant at St. Boniface, near Winnipeg, Man. The company plans to expend \$5,000,000 of its \$5,000,000 capital on immediate operations, and to build a 30-ton newsprint mill, employing about 700 men.

Canada's trade is growing at a faster rate than ever before, despite the war. She now sells to 100 and buys from 77 countries. Her total foreign trade, in the calendar year 1923, reached \$1,918,247,879, an increase of 16 per cent in 1923, and her interdependence of commerce increased 70 per cent between 1913-14 and the past year.

John B. Thompson, noted sportsman and writer on the out-of-doors, widely and popularly known by his pen name "Black Raptor," is visiting the Canadian Pacific bungalow camps in Ontario, giving demonstrations of his skill as a fly and bait caster, as well as free casting lessons to guests and will mail take on fishing and other outdoor subjects.

Creating a new record for the 15 years it has been in business, the Saskatchewan Co-operative Elevator Company will have handled 50,000,000 bushels of grain through its commission department in the 1923-4 season. It is announced. The estimate of grain handled through terminal elevators for the 1923-4 season is 58,000,000 bushels.

The steel superstructure of the new St. Anne de Beaupre Basilica, which is to replace the destroyed edifice at the famous shrine, has now been completed and it is expected that by next July the exterior of the church will be nearly finished. It is not anticipated, however, that the building will be entirely ready until July, 1926. In the meantime, thousands of pilgrims continue to visit the shrine and several altars have been recently opened.

Flour issued by the Department of Agriculture for the Province of Quebec show that there has been a marked improvement in the condition of farmers of the province over last year, due to good crops, to such an extent that, instead of distributing grain seeds to the value of over \$125,000 as was the case last year, only \$60,000 worth was necessary to meet this year's requirements. Hon. J. E. Cavan, Minister of Agriculture for the province, basing his predictions on the crop prospects, expects a still further improvement in the near future.

"Never has the opportunity for Canadian business in the Orient been so good as it is today," said Allan Cameron, Oriental Manager of the Canadian Pacific Railway, in Montreal recently. "It is true that the general volume of business in China and Japan is somewhat below normal owing to both local and world conditions but if Canadian manufacturers and producers do not fail to make an effort to secure the large share of Oriental trade that would naturally come to them, the opportunity will pass and someone else will get the business."

Following its success at the British Empire Exhibition, the Canadian Pacific Railway is arranging unusually fine displays for fall exhibitions in Canada. At Toronto, the exhibits will include a model of an Ontario hunting scene, having a painted background sixty by sixteen feet, a feature of which will be moose and deer moving through the forest and an attendant guide to give information to enquirers. A full-sized model of the front of a Canadian Pacific engine and other typical models depicting Canadian winter sports, round-the-world cruises, etc., are slated for Quebec, St. Lawrence, London and North Bay.

Do you know that The Times has considerably more than twice the circulation of any other paper in the district. Remember this when you are advertising!

BAKE YOUR OWN BREAD WITH

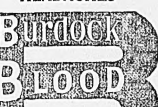

ROYAL YEAST CAKES

The standard of Quality for over 50 years

Many men become rich merchants by selling things that nobody needs, to people who can't afford them.

IF YOU SUFFER FROM HEADACHES

WILL GIVE YOU RELIEF

Mrs. G. H. White, 446 Barnard Ave., Vernon, B. C., writes:—"I have suffered all my life from sick headaches. A friend of mine advised me to take Burdock Blood Bitters, which I did, and I must say that I have never suffered from headaches since taking it. I must give B.B.B. all the credit for what it has done for me."

Burdock Blood Bitters has been on the market for the past 45 years, and during that time has been manufactured only by The T. Millburn Co., Ltd., Toronto, Ont.

## STUDY TUBERCULOSIS

## IN CATTLE

For the purpose of studying Bovine Tuberculosis and the transmission of the disease from animal to man and between animals, the provincial minister of health, Hon. Geo. Headley, has appointed the following committee: Dr. Rankin, dean of the faculty of medicine, university of Alberta; Dr. J. J. Owen, professor of pathology, Alberta university; Dr. Shaw, senior lecturer, Alberta university; Dr. A. H. Baker, superintendent of the central Alberta sanatorium; Dr. P. Talbot, chief veterinarian, province of Alberta; Dr. M. L. McCullough, assistant superintendent, Ponoka mental hospital; Dr. W. C. Laidlaw, deputy minister of health for Alberta.

It has been found that some of the cattle in the dairy herd at Ponoka are reactors to the tuberculin test. These have been isolated and it is the intention to study the reactions of the animals, as to the infectiveness. It has been the practice, and has been urged in the past, that such animals should be slaughtered. It was with the intention of stimulating further research on these lines that the minister has arranged for the formation of this committee.

## LABELS WILL TELL WHEN YOUR SUBSCRIPTION IS DUE

## ALBERTA POOL

## MAY BUILD ITS OWN ELEVATORS

Calgary, Aug. 11.—While the board of the Alberta Wheat Pool has declined to give any official statement of its policy concerning the purchase of elevators for the pool, it is understood that the directors are considering building elevators of their own.

At the annual meeting of the pool held here last week a protracted controversy waged over the question of elevators for the pool and the directors came in for some criticism. Some members wanted a fund established for the purchase of elevators at a future date when such a move should seem advisable and others demanded immediate taking over of elevators at certain points. The final outcome was the passing of a resolution leaving the entire matter in the hands of the board, which was re-elected in its entirety.

"That its policy would be governed entirely by circumstances," is the only statement issued by the board regarding its course in the matter. It is understood from a confidential source however, that the proposal that the pool build its own elevators is receiving the serious consideration of the board, which has been meeting in

NO ENVOY  
In my four cylinder calash I journey here and there; its crankshaft, made of seasoned ash, has energy to spare. The body, made of choicest tin, is much in need of paint; I know the fenders are a sin, the ancient top looks quaint. It has a home made steering wheel, with wire together tied; and yet when driving it I feel all swollen up with pride. For this old bus is all my own, I owe no man a groat, and like a king upon a throne I sit and guide my boat. The spark-plugs are not very good, I fashioned them of zinc; the pistons made of cottonwood are sometimes on the blink, but they are mine, such as they are, my credit's good and clean; and so I tool my groaning car with high gear and naughty men. My wagon lacks the modern curves, it has no four wheel brakes; its action hard upon the nerves; it bucks and creaks and shakes; and yet no man can view my truck and say "I'll call the police unless you pay the silver bugle you owe for gas and grease. I'll summon here the hailcuifers unless you pay me now for fixing up those busted gears that time you killed a cow." I'd rather.

Calgary for several days. It is probable that some move to buy, build or control elevators will be made by the board soon.

or own a rusty bus and owe no man a cent than scorch around with pump and fume while creditors lament.—Walt Mason.

### ROYAL FLEET REVIEW

A little swelling of the chest may be excused as one reads of the great review of the British fleet at Spithead, on Friday, the largest since the war. Many battleships have been replaced by destroyers and aircraft carriers. Safety first.

## MOUNT GEIKIE CONQUERED BY CANADIANS

TO Canadians goes the honor of being the first to set foot on the top of Mount Geikie, 10,854 feet in altitude and the highest peak in the Ramparts Range of Jasper National Park, along the main line of the Canadian National Railway. The party, composed of Cyril Wates, of Edmonton, Malcolm D. Geddes, of Calgary, and Val E. Fynn, of St. Louis, made their first ascent of Barbican Peak on July 12, and finding the passage too difficult there decided to return and attempt the southeast side, which route had been unsuccessfully attempted in 1922 by Mr. Wates and Dr. Bulver, of Edmonton. In that year Wates and Bulver got within 800 feet of the summit when they were compelled to turn back.

Two days later Wates, Geddes and Fynn left camp at 2:30 in the morning and climbed a steep snow gully and up rock chimneys and cracks, one of which led the climbers into the heart of the mountain, finally emerging like a tunnel on the north face with a drop of over 4,000 feet to the Tangu Valley below. After reaching the altitude where they had been in 1922 the party traversed a narrow ledge encircling the south side of the mountain and reached the top at four o'clock in the afternoon. In doing so they faced a difficult and dangerous rock climb, having to overcome rotten rock and falling stones at many points.

The party descended by moonlight, reaching their camp at 4:30

on the morning of July 15, exhausted but happy over their success.

Other parties are attempting to climb Mount Geikie this summer, but the honor of first reaching the summit must go to Wates, who has just successfully completed his third attempt. Another party, headed by Dr. Thorington, noted American climber, was attempting the ascent with guide Conrad Rain, when they saw the Wates party at the top and turned back.

The illustrations show the arduous south side of Mount Geikie; the successful climbers, from left to right, Messrs. Geddes, Fynn and Wates; and their awakening the morning after the ascent.

### WHEAT POOL DEFERS ACTION ON MATTER OF OWN ELEVATORS

A resolution referring the much debated matter of establishing a reserve fund for the purchase of elevators by the Alberta wheat pool, to the discretion of the trustees, was passed with a strong majority of the annual meeting of the members of the pool, Wednesday evening. This resolution was disposed of on an all day topic of discussion and weary after the midnight session of the preceding session, the delegates adjourned at 10 o'clock. At the morning session on Wednesday, the board of directors was subjected to severe criticism for having made no provision for the purchase of elevators when the right time should come, but after the re-election of the entire board of trustees at the afternoon session, the feeling of the meeting swung into a position strongly in favor of leaving this matter in their hands.

By a resolution calling for a change of bylaw, the date of the return ballots for the election of delegates to the annual meeting was fixed for two weeks later than before. It will now be the fourth Tuesday in June instead of the second Tuesday as previously. The matter of storing grain on the farm and allowing the farmer an offset for the one cent a bushel which he would be charged by the elevator each month, was brought up for the first time at the evening session and tabled for further consideration.

No definite decision regarding the sub-division of the former wheat pool zones and the election of delegates from each sub-division was reached until Wednesday morning, when it was finally decided to adopt this policy. There will now be ten zones in each of the seven large ones and instead of the ten delegates being elected at large, each will represent one of the smaller zones.

The board of the pool, which was returned with a vote of complete confidence, consists of the following:

W. J. Jackson, Edmonton wheat pool district; O. L. McPherson, Clearwater; R. N. Maudslow, North Calgary; Ben S. Plummer, South Calgary; H. W. Wood, Red Deer; C. C. Jensen, Lethbridge; Lew Hutchinson, Camrose.

### RAIL BOARD CHAIRMAN TO BE APPOINTED SOON FOR PASS RATE HEARING

Winnipeg, Aug. 11.—According to a special dispatch from Ottawa, a successor to the Hon. P. B. Carvell will be appointed at an early date in order that the Crow's Nest Pass hearing may be carried out according to original plans.

The names of Mr. Justice Mathers and Isaac McBlade, of Winnipeg, have been mentioned in connection with the post, the dispatch says, and Mr. Justice McKeown in the east is regarded as a strong possibility.

Being pessimistic is like taking an umbrella into a shower bath. What good does it do?

GOVERNMENT LIQUOR CONTROL ACT OF ALBERTA

### Application for Beer License

Public Notice is hereby given that the undersigned is hereby applying to the Alberta Liquor Control Board for a license to sell Beer by the glass, or open bottle, for consumption in conformity with the provisions of the Government Liquor Control Act of Alberta, and regulations made thereunder, with respect to the following premises: The Beer Salesman to be located in the room formerly known as the Barroom, and the south room adjoining, in the Arlington Hotel, located on Lots 1, 2 and 3, Block 1, Plan XV, Township of Millet, District of Edmonton, Alberta, this 21st day of July, 1924.

W. KEATS,  
Applicant.

### THE CANADIAN DOLLAR

The Canadian dollar is marching to its own, being almost on a par with the American dollar. Heavy shifting of balances from American cities to Canada is the chief reason for the improvement.

### FINAL PAYMENT OF \$5,250,000.00 BY WHEAT POOL

Calgary, Aug. 11.—Approximately \$5,250,000 is being distributed among Alberta farmers who are members of the Alberta wheat pool, in the final payment which is now being made. The actual amount received by pool members in the final payment per bushel is 16 cents for grades number one, two and three Northern; 15 cents, No. 4; 20 cents, No. 5; and 22 cents for some of the off grades.

On this basis it is estimated that the actual turnover of the Alberta pool in its first year's operations would be between \$25,000,000 and \$30,000,000. Wheat pool officials are not inclined to give out any definite figures in this connection, but on the amount of grain handled and the price received this appears to be a fair estimate.

According to the announcement made by the pool a few days ago, the farmers who sold their wheat through the pool will receive approximately 86 cents a bushel for No. 1 Northern. The price for No. 1 Northern carload lots, basis in store at Fort William, was given as slightly more than \$1.01

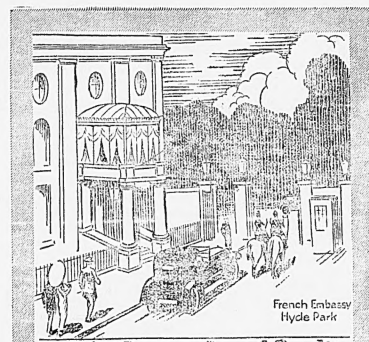

a bushel. Deduction of the freight rates cost of a little more than 15¢ a bushel leaves about 96 cents for the pool member, administration costs having been previously made. The gross amount received was stated to be a little more than \$1.03 a bushel. The cost of freight rates was deducted from the first payment. The first payment was on a basis of 75 cents a bushel in store at Fort William, which left around 54 cents a bushel for the farmer. The amount received for the other grades of wheat was correspondingly lower.

### CANADIAN FREEDOM

Freedom and protection of life and property are the points about Canada which have "dumbounded" eight hundred Mennonite immigrants who have settled in Ontario. They arrived ten days ago from oppressed soviet Russia.

### IRELAND PROGRESSES

Progress in Ireland is indicated by the proposal to develop electric power on the historic Shannon. This would be the first pretentious scheme of the kind in Ireland, and is better than fighting.

## Opening Up Our Scenic Resources In National Parks to Motor Tourists

During recent years there has been a noticeable increase in the interest shown by Canadians in the beauty of their own country and the potentialities latent in its great natural scenic resources. The motor car, which has revolutionized modern modes of travel, is taking people into the open and giving them opportunities to see the wonders of nature such as they never before had, and in this way our citizens, in growing numbers, are beginning to realize the extent of the nation's wealth of scenery and especially to appreciate the rich possibilities for enjoyment and recreation offered by the Canadian National Parks. The construction and maintenance of good motor roads is in keeping with the demands of the age and it is the ever increasing army of motor tourists, the members of which go their way bringing benefits to themselves and to the communities they visit. A good part at least of the steady growth in the number of visitors to the parks must be attributed to motor travel. Last year 8,900 cars entered Banff national park, the majority of which were owned by Canadians. Many of these visitors come with tents and camping equipment and spend their entire holiday in the park. The use that is being made of the parks in this way is a thoroughly democratic one and in keeping with the ideals behind their creation. For while no one can travel through the Canadian Rockies or spend even a few hours among the wonders of the national parks without gaining a new conception of the greatness and beauty of Canada and of the possibilities of national life, still the mountains yield their real riches only to those who come and live among them, absorbing through weeks their silent strength and peaceful serenity. These are benefits the parks were created to give and they cannot be gained by the visitor who rushes through them in a few hours either by railway or by motor car.

The extension of good roads in the parks has done much to bring the visitor into closer touch with those points of greatest scenic attraction, and the erection of tea-houses, camps and other conveniences along the principal highways has contributed to the enjoyment of the visit. The great advantage of motor travel over railway travel is that it permits the traveller to take his time. He may start when he will and stop where he pleases and there will be no time table to regulate his proceedings. In order that the extent of the highways constructed and maintained by the Canadian National Parks branch of the department of the interior may be better realized, a few comparisons with prominent highways will be of interest. The total length of the motor roads in use in the parks is a little over 330 miles, a mileage nearly as great as that of the famous Columbia river highway in the state of Oregon, and practically the same as that of the road between Montreal and Toronto. Banff national park, the oldest and best known of the parks, contains 130 miles of motor road, including a greater part of the Banff-Windermere highway. Sixty-two miles of the Banff-Windermere road extends through Kootenay national park. Jasper park contains 29 miles of motor road, including the completed portion of the new Edith Cavell highway; Waterton Lakes and Yoho parks each have 23½ miles of good roads; and the remaining 35 miles is divided among Mount Elbow, Revelstoke, Glacier, Point Pelee, Elk Island, and Buffalo national parks.

During the present season, the construction of new roads is being confined almost entirely to Jasper Park, although maintenance work is being continued on all the other park roads. The Edith Cavell highway, which has been constructed to within five and two-thirds miles of the Mount Edith Cavell, will be completed this year, but will not be open for traffic until next season. Trail road gives access to one of the most impressive scenic regions in Jasper park and will

bring visitors to the base of this famous mountain, memorial, with its solemn Ghost glacier. Work on the Jasper highway is being continued on the fifteen mile stretch from the town of Jasper to Pochonias, which is the starting point for the well known Miette hot springs. Clearing on the proposed motor road from Laggan in Banff national park to Field, in Yoho park, is also being carried forward this year.

### TAKING CARE OF

#### THE HONEY CROP

Honey is a perishable article, no matter whether it is left in the comb or extracted. With care it can be kept in good condition for long periods, especially in the extracted form. Nectar, as stored by the bees, contains a high percentage of water, which must be evaporated before the honey can be extracted. When the cells are filled and the right amount of evaporation has taken place, the honey is sealed over and is then considered to be "ripe". It is not advisable to extract honey until at least three-fourths of the cells are capped, especially in regions where the honey is inclined to be rather thin. Comb honey should be left on the hive until all cells containing honey are sealed but should not be left on any longer than this or the sections are likely to become travel stained.

The honey should be extracted as soon as possible after the supers are removed from the hives and if done while still warm, more honey will be taken from the combs. After the honey is extracted it must be strained to remove all foreign matter. Straining may be done through fine cheesecloth or by letting the honey stand in tanks for two or three days, when all foreign matter will have risen to the surface. If the honey is well ripened, it should be placed in the final containers at once, before it starts to granulate, but if it is too thin it should be left in the tanks for a short time for further ripening. Honey should be stored in a dry place, as it readily absorbs moisture from a damp atmosphere. Honey ripening in tanks should stand in a warm, dry room. Ripened honey in containers ready for market will keep better in a cold, dry place. Section honey should be stored in a well ventilated room where the temperature is high and constant, or moisture will condense on the cappings and be absorbed.

### Her Liver Troubled Her For The Past Year

Miss Pearl L. Zink, Darrington, N. S., writes: "I was awfully troubled with my liver, this last year back, and used to get such dizzy spells I would have to sit down while I was doing my work. In the morning when I got up, my tongue was coated, and I had a bad taste in my mouth, and oftentimes I was troubled with pains in my stomach. I suffered in this way until a friend of mine who had used your

**MILBURN'S  
LAXATIVE PILLS**  
told me of having used them. I then decided to get some and try them, and I can truthfully say that they certainly did me a lot of good. I cannot recommend them too highly to all those who are suffering as I did."  
You can procure Milburn's Laxative Pills at all druggists or dealers. Put up only by The T. Milburn Co., Limited, Toronto, Ont.

### APPROVE CREAM GRADING SYSTEM

Expressing approval of the system of cream grading established under the Alberta Dairymen's act, the following resolution was passed by representative milk and cream producers of Alberta, a copy of which has been received at the department of agriculture, at Edmonton:

"We, the undersigned, representative milk and cream producers of Alberta, hereby express our wholehearted endorsement of the Alberta Dairymen's Act, and the ministerial regulations made thereunder, and our approval of the system of cream grading established under the said regulation."

"Furthermore, having fully considered the recent prosecutions launched against the Meadow Creamery Co. of Allx, we unhesitatingly endorse the action which the dairy commissioner took in the matter in seeking to secure a strict enforcement of the act and its regulations."

"The owner of the Meadow Creamery Company was not fined for paying more for a particular grade of cream than his competitors. This creamery owner violated the Dairymen's act in paying for cream on a grade higher than the grade established by the government grader. He was also convicted for discriminating in paying less to one patron of the creamery than to another for the same grade of cream. This practice is specifically prohibited by the act. There is nothing in that act or in

the regulations of the minister of agriculture made under the act, to prevent a creamery owner from paying as large a price as he desires for any grade of cream. The regulations establish a differential of two cents between the grades of cream, but apart from that no restriction of any sort is placed upon the creameries in regard to the prices which they pay for cream shipped to them."

"We appreciate that the government grader, placed as he is between the producer and manufacturer, protects the interests of both, and that the present high standard of Alberta butter in the markets of the world is, in a large measure, due to the very efficient system of government grading now in force."

"The resolution was signed by Thos. Noble, S. S. Sears, J. N. Sparks, L. D. Hart, Geo. Harrington, Roy Cullen, D. J. Christie, N. S. Clarke.

Chase the gloom and don't be afraid of having a sunny disposition for fear of getting freckles.

## Join the Millions of Men who today enjoy better shaves

Less time is used in the Dominion, now, for shaving. And the millions of men who save that time, are also saved sore, irritated faces.  
Now we offer you the means to join these millions. To find out what they found out about shaving creams. No expense to you. We pay for the test.  
And you will discover why we worked for 18 months, making 130 experiments, perfecting Palmolive Shaving Cream. You'll at once appreciate the 5 distinct ways in which it gives better shaves:

By multiplying itself 250 times in richest lather.  
By softening any beard in one minute—without "rubbing."  
By the lather that lasts 10 minutes, if necessary.  
By the way extra strong-willed bubbles lather, with hair erect, for easier, cleaner cutting.  
By that cool, soothed after-feel—the result of carefully blended palm and olive oils.  
Millions of men could tell you. But it's more satisfactory to find out for yourself. If the test should fail—we are the only losers.  
Mail your coupon today—and get 10 shaves free.

## FRUIT TREATMENT FOR CONSTIPATION

### Quick and Permanent Relief By Taking "Fruit-a-Lives"

What a glorious feeling it is to be well! Want a relief to be free of cathartics, salts, laxatives and purgatives that merely aggravate constipation and are so unpleasant to take and so weakening in their effect?

Want a satisfaction to know that the juices of apples, oranges, figs and prunes will absolutely and permanently relieve constipation. By a certain process, the juices of these fruits can be concentrated and combined with tonics—and it is these intensified fruit juices that correct constipation, relieve headaches and biliousness, and make you well and keep you well.

"Fruit-a-lives" are sold everywhere at 25c. and 50c. a box—or sent postpaid by Fruit-a-lives Limited, Ottawa, Ont.

### FOR SPECULATORS ONLY

A decline in world production gives the wheat speculators a play ground in stocks on hand. This sort of advance in prices does not do the farmer or any good, for farmers just now have little or nothing to sell. They must wait for the new crop.

## Notes on Export Cattle Shipments

During the past three years the Dominion experimental farms have been making experimental shipments of store and fat cattle and chilled beef to Great Britain. In a shipment made in May, 1924, consisting of 140 head of store cattle of different ages and weights, from the experimental station at Lethbridge, Alta. South of the border, the following interesting facts are shown.

The total cost of shipment to Manchester, per steer, was as follows:  
From Lethbridge, \$42.60.  
From Scott, \$39.56.  
From Rosneath, \$42.13.  
From Lethbridge, \$35.30.

The shrinkage in raw and ocean shipment was as follows:  
Fat or short keep, average 1309lbs, from Lethbridge, 7.5 per cent.  
Steers, not so well finished, average 1255 lbs, from the same farm, at the rate of 5.3 per cent.  
Cattle from Scott, shrink 5.1 per cent in the case of yearlings and in two year olds, average 1265 lbs, 5.5.  
While 1148 Angus feeders from Rosneath lost 7.7 per cent, and 1322 butcher stores shrink 9.0 per cent.

### Deductions

1. It was apparent that care in rill shipping from the west has much to do with minimizing shrinkage. Over-crowding is responsible for heavy loss and cattle arrive at port of loading in a more or less exhausted, shrunk condition. Several hours rest at the feeding points, with exercise and opportunity to relax, is possibly more important than the feeding itself.  
2. Fat cattle lose more than those in a less favorable condition.  
3. Ocean shrinkage is comparatively light (under fair conditions as to weather and attendance).

### Which Pays Better

It is frequently stated that it pays just as well to sell in Canada as to export. In a general way this is true. It should be remembered distinctly, however, that for the classes the export trade has established or stabilized Canadian prices. In other words the British market has pulled up Canadian prices to the same level. In shipments from Saskatchewan and Alberta, maximum appraised values at point of shipment, were, with the exception of one lot of yearlings, increased by from 2 to 52 cents per hundred. Quebec cattle of higher inherent quality on export, exactly equalled prices received at the farm for cattle of like quality. If the price of cattle in Canada is equal to net export prices, this benefit is directly due to the removal of the embargo.

### Brief Deductions from Experiment

1. Uniformity of groups is a most important factor in successful sale. The man who can breed or buy for export stores of uniform color gets the proverbial benefit of the buyers' first impressions. The low set, blocky type of steer gets the feeder's eye.  
2. The British feeder likes best a bullock that is young enough and young enough to grow and fatten at the same time. The yearling or two year old steer that has been wintered economically on home grown feeds and with cheap housing, and that is shipped off grass in the fall, is a good proposition for both buyer and seller. For the former he grows and fattens, for the latter he represents a sale of a strictly home produced article.  
3. The lighter spring shipped feeder steer may go forward from February to April, to finish off grass as fat in August and September. During April, May and June the "short keep" or cattle forward in condition will find a market, provided they will develop not more than an 800 pound carcass when subject to a "short keep" following period. It must be remembered that the short keep, fat, choice butcher steer, when exported, requires a heavier investment at a greater feed cost—to the shipper and is frequently a riskier proposition. Shipping the feeder steer that has been developed largely on grass and home grown roughage with little concentrates, involves minimum risk on the part of the shipper and allows the British feeder to do the gambling.  
4. The time of shipment, therefore has much to do with the weight and age of steer to ship. The young light weight steer, if well selected, is very popular as indicated by this experiment. Unless prices are markedly advanced for the 500 pound steer, however, the economy of shipping him is doubtful. Speaking generally, the butcher or retail type of steer demands the highest price when fat. The British dealers like the handy weight butcher steer, just as in Canada. The shipper would do well, therefore, in selecting steers that would land in

England weighing not greatly in excess of 1200 pounds.

5. Horned cattle are at a distinct disadvantage.

6. Branding on the ribs is distinctly objectionable.

7. Finally, it may once more be pointed out that Great Britain need not be considered as a profitable outlet for the common butcher steer, of which there is too great a percentage on our markets. Breeding herds of beef cattle in Canada cannot be allowed to deteriorate, if we are to cater to and make a name for ourselves on the British market.

Further particulars regarding these shipments may be obtained from the Central Experimental Farm, Ottawa.

## SWAT THAT WEED

Stinkweed, or French Weed, as it is sometimes called, is a winter annual of European origin and has been introduced from Manitoba and eastern Canada. The plant varies in height from 6 inches to two feet, depending upon the space it has. If standing thickly on the ground it will produce seed at four to six inches in height. It grows erect with branches from the upper parts. The lower leaves are spear shaped and clasp the stem. The leaves are green, with a reddish or crimson tint, a very disagreeable odor—hence the name Stinkweed.

Cows feeding on this plant produce milk with a very disagreeable flavor similar to the odor referred to above. This flavor cannot be removed and creameries will refuse to accept this product as the flavor will be noticeable in the milk, the cream and the butter. The seed will produce the same result and is often picked up by the cows when turned out to the freshening lots in the fall. Cows will not feed upon it by choice but if pasturing in an infested field will always get some of it. The flowers are small and have four white petals.

The seed pods are nearly round in shape with a notch at the top. Each pod usually contains about 14 seeds and an ordinary plant will produce from 1500 to 15000 seeds, so it can multiply very rapidly. The plant is a voracious feeder and takes a large amount of moisture and plant food from the soil. Being a winter annual it lives through the winter as a rosette of leaves and is ready to come along very early in the spring. It flowers from April to September and where it has wintered over it is nearly always seeded before the farmer is ready to plow his summerfallow. It occurs in grain fields, barnyards, roads and pastures whether the land is cultivated or not.

Since it is such a prolific seeder it is very difficult to eradicate when once established. Hand pulling and burning will be effective on small areas, but of course will not be practical over large fields. One cardinal principle to keep in mind in cleaning out this weed is that it must be grown out of the land—it cannot be smothered out. The seed is very oily and has been known to lie in the land for 25 years and then grow when conditions became favorable. The aim should be in summerfallows to make conditions favorable for growth and then to kill by thorough cultivation and in grain fields to endeavor to make conditions such that the grain will get ahead of the weed. The latter will not destroy it but will keep it in check and give a crop. Summer fallows should be discarded or cultivated the previous fall to germinate the seed and then the land should be plowed early the following season and thoroughly cultivated each time a crop of weeds appears. It is a mistake to keep the land black in fighting this kind of a weed, as it must be given a chance to grow and then be killed. The seed when once formed will ripen under the furrow and when it has reached that stage it should be burnt.

When once this weed is thoroughly established in the land it is well nigh impossible to eradicate entirely. If that stage is reached one of the best methods of control is harrowing the growing grain. Preparations for this by a light harrow seeding and then use a light harrow several times. The time to harrow all annual weeds is when they have just one pair of leaves. At this stage they are very tender but when they have the second pair of leaves it is almost impossible to harrow them out without using a very heavy harrow and destroying the grain. If there are comparatively few of these weeds do not lay up trouble for the future by plowing deeply. This will put them down out of the germinable depth, but they will surely rise again and give trouble when the least expected.

Seeding to grass will not kill the Stinkweed, but it will keep it in check and provide an opportunity for working the rest of the farm. The weeds are quite small, weak, and not difficult to clean out of grain. Be careful of seed grain and horse feed.

## TRAIN RADIO OPERATOR

THE wireless operator is a familiar and sought for figure on the ocean liners of today. The radio operator aboard the all-steel Continental Limited, the transcontinental express of the Canadian National Railways, is fast becoming known and daily he is fulfilling his part of the work of the regular train crew on that service. The photograph illustrates the uniforms worn by the radio operators, similar in many respects to that of the operator of the ocean liner, but bearing on the lapels and cap the monogram of the Canadian National Railways. The suit is tailored of fine blue serge with double breasted coat with gold buttons and one strip of gold braid on the sleeve, indicating the rank. The Canadian National Railways are the first company to inaugurate this service as a regular part of their equipment.

Sheep, though not fond of this weed will eat many of the young plants.

When the first small plots of this weed appear in a district it should be regarded as a community menace and should be quarantined. They are just as catching as measles or diphtheria and are often just as far-reaching in their results. There is no anti-toxin for them except hard work and constant vigilance.

Was Troubled With Her Heart and Nerves For Years

Mrs. James Rutledge, Napier Station, N. S., writes: "I think it my duty to tell you about what Milburn's Heart and Nerve Pills have done for me."

For years I was troubled with my heart and nerves, and was so weak, at times, I would faint away and fall right down where I was sitting or standing, and after one of these attacks I would sometimes lie in bed for weeks at a time and feeling that life was not worth living.

I finally started the use of MILBURN'S HEART AND NERVE PILLS

and after using the first box I saw I was getting relief, and after using them for a short time I found they did for me what no other remedy had ever done."

Milburn's H. & N. Pills are for sale at all druggists and dealers; put up only by The T. Milburn Co., Limited, Toronto, Ont.

## Ninth Government Report of Crops

issued by the department of agriculture, Edmonton, Saturday, August 31st.

Variableness of the weather conditions at the present time in Alberta, makes any really definite statement on crop conditions almost impossible. Since the last report, issued two weeks ago, unusually heavy rainfall has occurred in almost every district of the province, accompanied by low dips in temperature. Though this precipitation was from three weeks to a month late, and cannot change the general situation with respect to grain crops to any considerable extent, some improvement has been shown in summer fallow crops, and in districts where the damage from drought had not been too great. With favorable weather conditions from now on until the harvest, many districts should have a good average crop where prospects were not so bright a fortnight ago. Throughout the greater portion of the east central and southern districts, however, the rain has come too late to revive the grain, and the yields will be very low.

In west central and northern districts and eastward from Edmonton to the border of the province, grain conditions continue satisfactory, with improved conditions as a result of the late rains. Continuous warm weather is now needed until harvest, however, to fill and ripen the grain. Weather at present date is still cool and showery. There has been no frost, although the temperature has been close to the frost line on several occasions. Precipitation throughout the province during the two weeks

has ranged from three quarters of an inch to two inches, some very heavy storms being recorded in districts which previously had very little rainfall.

The most notable improvement from the late rains has been in the feed situation, and there is prospect of fairly heavy yields of greenfeed in many districts. The first cutting of alfalfa on the irrigated lands in the south produced one of the best crops ever harvested, the yield averaging about one and a half tons to the acre. The second crop is almost ready for cutting.

Harvesting of wheat has commenced in the Lethbridge district, and will commence next week in the Medicine

hat district, becoming general within the next ten days in southern Alberta. In the central and northern districts, harvesting will be considerably later, as the grain is only now beginning to ripen.

### Provincial Weekly News Bulletin

**Big Milling Firm Invests in Alberta**  
Negotiations have been concluded by the Spillers' milling interests at Great Britain, to take over the interests of the Alberta Flour Mills in Calgary, and complete the large mill now under way by that company. The cost of completing the mill will be about \$1,500,000. The designed capacity of the mill is 10,000 barrels per day, and the payroll will be upwards of a quarter of a million dollars yearly. It is stated that the Spillers' interests eventually plan to invest in the milling of grain. Prominent Albertans will join the directorate of the new Alberta concern.

**Lethbridge Grain Shipments**  
Grain shipments for the 1923-24 season out of the Lethbridge division of the C.P.R. totaled 27,700,000 bushels, of which 21,000,000 was wheat.

**New Cooperative Pools**  
During the past week cooperative marketing has been advanced a step further in the province with the organization of the Alberta Cooperative Brostock pool and the Alberta Dairy Producers Limited, both of which plan to market products throughout the province on a contract pool basis.

**Good Farming Counts**  
H. K. Bohannon, an Alberta farmer who came from Illinois originally, and is now 72 years old, tells how he has successfully raised crops in a district affected in some years by dry conditions. He lives at Silbald, in which district in 1922 light yields were obtained. After the crop of that year Mr. Bohannon wrote to the *Halifax Herald* as follows: "I don't know whether I am farming in a dry part of Alberta or not, but we have raised on our place by our system from 20 to 30 bushels of wheat per acre for the last two seasons, and the lowest yield I ever had on the farm in eleven years was in 1914, by the old system, when we raised 17 bushels per acre, and we have raised as high as thirty bushels of wheat and ten bushels of oats per acre. So why should I not think this the best country in North America."

**Promotions at the ROSE BRIAR SCHOOL**  
The following are the promotions at Rose Briar school based on the year's work and the results of the June tests:  
From Grade VII to VIII—  
Ortha Plaha, 55.  
Lottie Rosser, 50.4  
Harold Standefer, 45.1  
Pam Leew, 51.8.  
From Grade VI to VII—  
Lloyd Rosser, 52.  
Louie Rosser, 52.  
Mabel Loran, 47.5 (on trial).  
From Grade III to IV—  
Mary Rosser.  
Arnold Frohland.  
Ralph Plaha (on trial).  
From Grade III Jr. to III sr.—  
Grant Stowell.  
From Grade II Jr. to II sr.—  
Paul Conrad.

**HILLSIDE**  
Miss Beth Hovos has been successful in passing her eleventh grade. Congratulations.  
Mrs. Howard Marr is a delegate for the U.F.A., and E. R. Hoskins for the U.F.A. to the convention this week.

Mrs. Houston and young son, who have been visiting her sister, Mrs. C. L. March, left this week for her home at Stratford, Ont.

Hillside Store is the name of the Young People's Club formed by Mrs. Rev. Mr. Johnson. The following were the officers elected: President, Beth Hovos; secretary, Lolla Marr; Treasurer, James Hoskins. The club meets every Friday at 8 p.m.

**CANNOT HAVE BOTH**  
"Motoring and athletics spoil complexion," says the Commemorative Society in convention at Chicago, and adds, "Girls who want bright eyes must not wear too tight high heeled shoes. And girls who don't want lines in their faces must stop using vanishing creams and soaps and apply cleansing and cold creams instead."

**Want a Partner?**

### TOWN TOPICS

Mrs. and Mrs. Alex. Sims left on a motor trip to the mountains on Sunday.

E. R. Pendleton, of Edmonton, was a business visitor to the city last week.

Dr. Gallekson has returned from his auto trip and has resumed his practice.

Miss Molly Plant of Millet, was the guest of Miss Edith Cooke, over the week end.

Clarence Greiner, who has been teaching at Tofield, is spending his holidays with his parents.

Mrs. J. E. Burkholder, who has been visiting friends in Saskatoon, returned home Wednesday morning.

Miss K. Fenton, who has been visiting friends in Edmonton for the past few weeks, returned home last week.

Mrs. Plant, Mrs. Mitchell and children, of Millet, were visitors at the home of Mr. and Mrs. H. C. Cooke on Friday.

The Norwegian Ladies' AM will meet at the home of Mrs. A. Jorgensen on Friday, August 15th. Every body welcome.

J. W. Bailey expects to leave the end of this week on a trip to California, and will be away an indefinite length of time.

The Wetaskiwin Produce Co. are erecting a new elevator at Ponoka, the old building at that place being now torn down.

A pleasant surprise party was given for Walter Greiner on Wednesday evening of last week, when about fifty young people assembled at his home. Dorothy Ward, Ada Dickson and Valhalla Greiner returned home from attending summer school in Edmonton. They report having enjoyed the work immensely.

Mrs. Arthur Manes and daughter left on Saturday of last week for their home in Calgary, after three weeks' stay at the home of her parents, Mr. and Mrs. Thos. Torsen.

Messrs. A. D. Irving and P. O. Baker and families returned Monday from their motor trip to Banff, Lake Louise and Lake Windermere. They report a very enjoyable tour.

We understand that Miss Beaudette who was granted a six months' leave of absence from the staff of the Alberta public school, will not resume her duties this fall. Her resignation has been received by the secretary, and will be dealt with at the next meeting of the board.

The editor and wife, who have been on a trip through Belgium, France and the British Isles with the party of Canadian weekly newspaper people, returned home Wednesday morning. They were about about ten weeks and were not sick an hour throughout the entire trip. We will make reference to the trip during the next few issues of The Times, the first installment appearing next week.

### BUSINESS LOCALS

\*\*\*The Lawson Store is having a big 50c Grab Pared sale on Saturday.

\*\*\*The early on Saturday morning The Lawson Store are putting on a big Grab Pared Day.

A dance will be held in the John Knox school on Friday, August 15th, under the auspices of the school district. Admission \$1.00 per couple. Extra ladies, 25c.

\*\*\*The Grab Pared Sale at the Lawson Store will be successful. The firm can always be relied upon; their goods are always what they are advertised to be.

\*\*\*Klaus & Son, auctioneers, wish to announce that their sale advertised in last week's issue for August 9th, but postponed on account of the fair, will be held at the auction mart on August 16th.

### DAIRY PRODUCE

The production of dairy produce of Alberta this year will be 29 per cent heavier than in 1922. Dairy Councils' show Market predicts. The total production of butter in the province last year was 17,500,000 pounds, and Mr. Marker believes the output this year will reach the new high record of 22,500,000 pounds at least. There will also be an increase in cheese production and other dairy produce. The farmers in this province are steadily increasing their mixed farming operations, with the natural result they are adding more dairy cows to their herds. This accounts for the increase, Mr. Marker says.

### COMMUNICATION

### PAYING TOO MUCH FOR CREAM

An Open letter to E. E. Sparks, M.L.A. Editor, Wetaskiwin Times:

Dear Sir—I take this means of drawing your attention to the extraordinary case, reported in The Wetaskiwin Times, of August 7th. At the same time, to ask of you, enlightenment. It seems so very important to the majority of the farmers in your constituency.

Mr. N. A. Larson, it is reported, of the Meadowbrook Creamery, at Alxa, has fixed recently in the sum of one hundred and forty dollars (\$140) for the crime of Paying Too Much For Cream.

This evidence of the prostitution of provincial legislation to a purpose so manifestly contrary to all the principles of open and fair dealing—it is not surprising to learn—angered the hidden fortunate patrons of the defendant in this case.

You, as a member of the Legislature, pledged to look after the interests of your constituents, knew, or must certainly should have known, of a Statute which so nearly affects the majority of your rural constituents, who have repeated confidence in you.

It causes as a shock; the knowledge that the government of Alberta has enacted a law destructive of competition in cream buying, and lends her courts to punish one who may, by economy and at the instance of a sense of fitness, choose to give a more equitable price for cream, than the general run of creameries are willing to do.

I am sure it will interest farmers of this section to have your explanation of this paternal fostering of a notoriously prosperous industry.

It would also be interesting to know whether or not egg dealers, cattle and hog buyers, are similarly protected by the Farmer Government.

Yours sincerely,

J. H. Hodson.

### WHAT OF THE REFERENDUM?

Editor, Wetaskiwin Times:

Dear Sir—What has become of the Moderation League? A few months ago this splendidly organized campaign helped to rid this province of an obnoxious law. Why have they again tolerated the imposition of a system with which the great majority of the electors have no sympathy? The result of the recent plebiscite on the liquor question was an overwhelming vote in favor of government control of the sale of 'all' intoxicating beverages. The return to the saloon system, which the government has sanctioned, is in direct opposition to this clearly expressed will of the people. There is not—and cannot be—any proper control of the sale of beer in the barrooms. In this matter both police and bartenders are asked to achieve the impossible.

The present writer does not favor prohibition, which he believes to be as un-Christian as is un-British, and therefore bound to prove a failure—at any rate in an empire whose catchword is Liberty. With the privilege granted to the public of purchasing their liquor supplies through the official vendors, there is neither need nor justification for the re-opening of the saloons.

There is a growing feeling that in this matter the will of the people has been flouted.

The Moderation League would be well advised to organize at once such pressure as shall compel the government to close the saloons before their already harmful influence does further harm. At this evil is allowed to grow unchecked, the consequence must be a revolution in public feeling, but that case a case, even more detrimental to public morals than the disease, will no doubt once more be attempted.

Faithfully yours,  
(Rev.) W. J. James.

### THE EDITOR'S BEATITUDES

Blessed are the merchants who advertise because they believe in it and in their business; for their prosperity shall increase many fold.

Blessed are the county correspondents who send in their well written items every week, for fame of their friendly neighborhoods shall go abroad in the land.

Blessed is the woman who sends in a written account of a party or wedding, for she shall see the details of the function and the names of her guests correctly reported.

Blessed are all those who do not expect the editor to know everything, but who call him up and tell him whenever an interesting event occurs to them; for they shall have a newsy paper in their hands.

Blessed are them who get their copy in early, for they shall occupy a warm place in the editor's heart.

Blessed are all those who cooperate with the editor in his efforts in behalf of the community; for their town shall be known far and wide as a good place in which to live.

### WHL SWIMMER FAILS TO CONQUER CHANNEL

Boulogne, France, Aug. 11.—Lillian Harrison, the 29-year old Argentine girl, started today from Cape Griz Nez in an attempt to swim the English Channel, but injured her leg on a rock as she entered the water.

She was severely bruised, and gave up after swimming several hours, because of the increasing pain.
